

# How to support your child with maths targets

Dear Parents/Carers

We are making videos explaining how to support your child to achieve targets that we have given them. These are all on our Wembley Primary School Reception YouTube channel. I am listing the ones that have been made so far, with the link to that video, so they are easier to find. Please make sure that you watch these as they should explain what you need to do to support your child to achieve these targets. Please remember, you can always ask your class teacher if you are not sure how to support your child with any area of learning.

**What is Numicon and how you can use it to support your child at home?**

Numicon is a fabulous resource that you could buy new or used on eBay and sell on when you no longer need it. This video shows you some of the ways you can teach your child maths at home with it.
